

Oil and Gas Forms - Texas Production

Helps manage your production data.

Oil and Gas Forms - Texas Production computer program allows you to print Form PR, graph Production Data, print Owner Interest Reports, reconcile Run Tickets with Purchaser Statements, track pumper data, and help you file your reports using the RRC's Electronic Data Interchange (EDI). It carries forward end of the month balances, calculates and verifies production figures, thereby reducing the need to file corrected reports. And when needed, *Oil and Gas Forms - Texas Production* will prepare your corrected reports for you. This program sells for \$339.00 and has an annual licensing and maintenance fee of \$100.00.

Features

Standard Functions

Carries forward end of the month balances.
Prints RRC Form PR).
Calculates end of the month balances.
Calculates production volumes.
Verifies that formation production equals dispositions.
Calculates well separation extraction loss.
Creates corrected reports.
Prints blank RRC reports.

Run Ticket Entry

Calculates net barrels.
Calculates corrected gravity.
Uses abbreviated tank tables.
Reconciles purchaser statements with run tickets.
Creates RRC report dispositions from run tickets.

Pumper Reports

Accepts daily pumper gauges.
Prints daily production data.
Graphs daily production data.
Calculates end-of-the-balances.
